

# Eyelash Extensions Aftercare

## First 24-48 hours

- Be gentle.
- Avoid oil-based ANYTHING near eye area.
- Avoid exposure to anything (water, shower, heat, steam, tanning, touching, etc.).
- Do not use makeup or mascara.
- Do not sleep on your face.

## Long-Term

- Do not rub your eyes excessively.
- Do not pick at your lashes.
- Avoid touching your lashes as much as possible.
- Do not sleep on your face.
- Avoid oil-based mascara (including waterproof mascara).
- Do not use oil-based cleansers or makeup.
- Do not frequently visit the sauna or steam room.

## Refills

After 3 to 5 weeks, some of your natural lashes will have shed. **Eyelash Extensions will have to be reapplied to new lash growth every 2 to 4 weeks.** It may be necessary to remove a few lashes if they have grown crooked or too long. It is encouraged that you use our protective sealer and a heated eyelash curler. These products will prolong the life of your Babe Eyelash Extensions.

## Protective Sealer

Adhesive may dry with microscopic gaps. The purpose of the protective sealer is to seal the gaps in the adhesive and protect the adhesive bond against water, oil, and dirt that may get between the gaps and disturb the bond. **It will extend the life of the lashes by 1-2 weeks if used properly.**

### How to Use Protective Sealer:

- Wait at least 48 hours after application of lash extensions before applying protective sealer.
- Apply to the lashes only. Do not leak into eye.
- It only takes a very small amount of the protective sealer to be effective.
- Apply every 3 days.

## Mascara

Our water-based mascara is formulated specifically for use on eyelash extensions to ensure longevity. It is gentle enough for everyday wear and is easily removed. It will give a more dramatic look without damaging the adhesive bond.

**\*\*Please note:** Any water soluble mascara can be worn; however, constant use of mascara may shorten the lifespan of the eyelash extensions. **Water proof mascara is NOT recommended,** as it will dissolve the adhesive bond.
